

EXECUTIVE SUMMARY

Senior IT professional with 14+ years of experience spanning hands-on enterprise infrastructure administration, ERP/CAFM implementation, and IT project and product leadership. Currently leads the ENFM360 enterprise digital transformation program at Emirates National Facilities Management, run under a hybrid Agile/Waterfall methodology, managing a cross-functional IT and delivery team of 20–22 and an annual technology budget of AED 2.3M. Personally chairs the program steering committee, maintains the RAID log, owns vendor management for the IT-related portfolio, and reports directly to the CEO. Delivers Windows Server, Active Directory, Microsoft 365, and Azure infrastructure alongside a growing suite of customer- and vendor-facing digital products (portals, mobile apps, QHSE and training modules, system integrations) for an organization of 4,200+ employees. Led business transformation for fleet & vehicle management, mobile workforce management (technician field app with GPS-based updates), and full asset lifecycle management — logistics- and operations-adjacent capabilities integrated with the broader ERP/CAFM ecosystem, supported by Power BI KPI dashboards for SLA compliance and operational performance. Earlier career spans ERP and CAFM implementation consulting and enterprise .NET / REST API development, giving a full-lifecycle grounding from solution build through client-side rollout, support, and governance. PMP-certified, with working experience across Azure AD, RBAC/MFA access governance, SQL Server, Power BI, and PowerShell automation. Certified in Generative AI and Prompt Engineering for Project Managers, with a track record of translating business requirements into implementation roadmaps, running feasibility and vendor evaluations, and reporting outcomes to executive leadership.

Highlights: 14+ Years Experience • PMP® Certified • AED 2.3M Annual IT Budget Managed • 20–22 Team Members Led • 4,200+ Employees Supported • 30% Improvement in Incident Resolution • 25% Reduction in IT Operating Costs • MEFMA Digital Transformation of the Year, 2024

CORE COMPETENCIES

Business Transformation & Delivery	Technology & Analytics
Digital Transformation Leadership	Microsoft Azure & Azure AD
Business Requirements & Roadmap Definition	Power BI (KPI & Executive Dashboards)
Feasibility & Vendor Evaluation	SQL Server & ERP/CAFM Systems
Budget & Resource Management	PowerShell Automation
Stakeholder Management (Exec to Operational)	Windows Server & Microsoft 365
Program Governance (Steering Committee, RAID)	Generative AI & Prompt Engineering (Certified)

PROJECT PORTFOLIO SUMMARY

An overview of major engagements across Ankur's career. Detailed project sheets follow below.

Project / Engagement	Client	Duration	Your Role
ENFM360 Enterprise Digital Transformation Program	Emirates National Facilities Management (ENFM)	Sep 2021 – July 2026	IT Manager-Digital Transformation Leader
ERP & CAFM Platform Implementations (multi-client)	Lattice Software Solutions LLC	Oct 2017 – Aug 2021	Sr. Implementation Consultant

Project / Engagement	Client	Duration	Your Role
ERP System Implementation & Data Migration	Realtime Technologies LLC	Oct 2014 – Sep 2017	ERP Solutions Specialist
Enterprise Web Application & REST API Development	Suntech Business Solutions LLC	Mar 2012 – Sep 2014	.NET Developer

DETAILED PROJECT EXPERIENCE

ENFM360 Enterprise Digital Transformation Program

Client: Emirates National Facilities Management LLC (ENFM)

Role: IT Manager-Digital Transformation Leader – Enterprise Applications & Digital Transformation

Duration: September 2021 – July 2026

Annual Technology Budget: AED 2.3 Million

Team Size: 20–22 (cross-functional IT and delivery team)

Organization Scale Supported: 4,200+ employees, multi-site

Technologies: Windows Server, Active Directory, Microsoft 365, Azure (VMs, Azure AD, IAM), RBAC, MFA, SQL Server, ERP systems, Power BI, PowerShell

Methodology: Hybrid (Agile + Waterfall)

Key Stakeholder: CEO (regular reporting and coordination)

Modules & Sub-Projects Delivered

- Customer Portal
- Vendor Portal
- Customer Mobile App (English/Arabic)
- B2C App
- Hospitality App
- QHSE Module
- Training Module
- Client / Vendor System Integrations
- E-Invoicing Integration
- Fleet & Vehicle Management (vehicle master data, maintenance tracking, inspections, service history, operational reporting)
- Mobile Workforce Management — Technician Mobile App (work order receipt, job status updates, service reports, photos, customer signatures, GPS-based field updates)
- Asset Management (full lifecycle: registration, preventive & corrective maintenance scheduling, warranty tracking, asset history, performance reporting)
- Inventory & Procurement Integration (spare parts, purchase requests/orders, vendors, and inventory linked to maintenance activities)

Scope of Responsibility

- Manage and maintain Windows Server, Active Directory, Microsoft 365, and Azure environments supporting enterprise applications across a multi-site organization.
- Administer Azure cloud infrastructure — virtual machines, Azure AD, identity and access management — supporting enterprise application hosting, scalability, and secure remote access.
- Implement cybersecurity and access governance controls, including RBAC, MFA, and Azure AD security policies, to protect business-critical systems.
- Support virtualization, backup, and disaster recovery planning for business continuity readiness.
- Use PowerShell to automate routine administrative and operational tasks, improving efficiency and consistency across IT processes.

- Support enterprise applications and ERP systems, including SQL Server-based platforms, ensuring performance, reliability, and data integrity.
- Provide senior-level technical support and escalation resolution across enterprise applications and infrastructure.
- Lead infrastructure modernization, cloud migration planning, and digital transformation initiatives as part of the enterprise IT roadmap.
- Manage a cross-functional IT and delivery team of 20–22, overseeing infrastructure, applications, and governance across an annual budget of AED 2.3M.
- Led the award-winning EnFM360 Digital Transformation Program, integrating infrastructure, security, and enterprise applications into a unified digital ecosystem.
- Led business transformation for fleet, mobile workforce, and asset management capabilities — working with operations, maintenance, procurement, and finance to gather requirements, define business processes, prioritize features, and oversee implementation, testing, and change management (role was business/program leadership, not direct fleet operations management).
- Developed Power BI dashboards to monitor KPIs including asset utilization, work order turnaround, SLA compliance, preventive maintenance completion, and operational performance.
- Ensured fleet, asset, and workforce management modules integrated seamlessly with the broader ERP/CAFM ecosystem alongside finance, procurement, HRMS, and customer service.
- Personally chair the program steering committee and maintain the RAID log for risk, assumption, issue, and dependency tracking.
- Own vendor management for the IT-related portfolio, including engagement and coordination with technology vendors supporting infrastructure and applications.
- Report and coordinate directly with the CEO on program status, priorities, and decisions.

Measurable Outcomes

- Improved incident resolution efficiency by 30%.
- Reduced overall IT operating costs by 25%.
- Reduced process turnaround time by 40%

ERP & CAFM Platform Implementations (Multi-Client Engagements)

Client / Employer: Lattice Software Solutions LLC

Role: Sr. Implementation Consultant

Duration: October 2017 – August 2021

- Supported ERP and CAFM platform implementations for enterprise clients, including system configuration, data migration, and infrastructure-related setup.
- Provided technical troubleshooting and support during implementation and post-go-live phases, ensuring system stability and client satisfaction.
- Conducted business requirement gathering, process analysis, and functional gap assessments, translating client requirements into system configurations and product enhancements.

ERP System Implementation & Data Migration

Client / Employer: Realtime Technologies LLC

Role: ERP Solutions Specialist

Duration: October 2014 – September 2017

- Supported ERP system implementation, configuration, and data integrity throughout migration processes, working closely with infrastructure and technical teams.
- Gathered and documented business requirements conducted functional analysis, and mapped business processes to ERP modules and system capabilities.
- Supported user acceptance testing (UAT), issue resolution, user training, and post-implementation support, ensuring smooth adoption and effective system utilization.

Enterprise Web Application & REST API Development

Client / Employer: Suntech Business Solutions LLC

Role: .NET Developer

Duration: March 2012 – September 2014

- Designed and developed enterprise web applications and REST APIs using ASP.NET, .NET Core, and SQL Server, building deep hands-on technical grounding in enterprise systems.
- Developed and optimized **database-driven applications, SQL queries, stored procedures, and backend services**, ensuring application performance, data accuracy, and scalability.

TECHNICAL SKILLS

Infrastructure & Cloud	Security, Data & Applications
Windows Server & Active Directory	Azure AD, RBAC & MFA
Microsoft 365 & Azure	PowerShell Automation
Virtualization	SQL Server
Backup & Disaster Recovery	ERP Systems
Enterprise Networking	Power BI

LEADERSHIP & GOVERNANCE EXPERIENCE

- IT & Delivery Team Leadership — 20–22 cross-functional staff
- Annual Technology Budget Ownership — AED 2.3M
- Vendor & SLA Management (as part of infrastructure and application operations)
- IT Governance across infrastructure, applications, and security policy
- Digital Transformation Roadmap Ownership

CERTIFICATIONS & AWARDS

Certifications

- PMP® (Project Management Professional, PMI)
- Generative AI for Project Managers
- Prompt Engineering for Project Managers

Awards

- MEFMA Digital Transformation of the Year, 2024
- Technology & Innovation in FM, 2025
- Technology Implementation in FM, 2024 & 2025

EDUCATION

Bachelor's Degree – Computer Science
